WETH-R-STRIP

INSULATED STOP

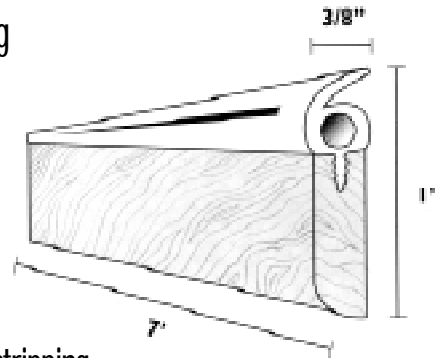

MAGNET-STOP

Since 1957, PortaSeal has been manufacturing fine weather-stripping products.

Our **WETH-R-STRIP** product is an economical, high quality, full size, wood door stop and also works on windows too. It has a self-adjusting air tight seal keeping outside air from coming in.

WETH-R-STRIP provides a permanent self-adjusting weather-seal for all exterior doors and windows. (for metal doors, see our Magnet-Stop product!)

WETH-R-STRIP combines fine quality pine, primed, with flexible vinyl, securely stapled—at a great price! The product is ideal for those on a budget who need to replace old, worn out weather-stripping on doors and windows. Its free flange will adjust to compensate for door warp-age over the years.

WETH-R-STRIP is easy to install — simply nail to outside frame. Each set contains one 3' header and two 7' side stops. Packed 12 sets per display carton.

PortaSeal makes other fine weather-stripping products designed for customer satisfaction and high profits. Check out our **MAGNET-STOP**, **INSULATED DOOR-STOP**, **GARA-SEAL** and **GARA-BOTTOM** products, only from PortaSeal!

PORTASEAL products sell themselves in our retail rack.
